Species-specific and universal DNA probes and amplification primers
to rapidly detect and identify common bacterial pathogens and
associated antibiotic resistance genes from clinical specimens for
routine diagnosis in microbiology laboratories

Predicted amino acid sequence is indentical to that of the H.Influenzae PC protein (Nelson et al., Infect Immun 56, 128-134, 1980). Protein sequence is also 60% homologous to the E.coli pal gene product (Chem and Henning, Eur. J. Biochem. 163, 73-77, 1988).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1 bp upstream of BglII site

Murphy, T.F. and Apicella, M.A.
Plasmid for production of membrane protein, bacterium containing
same, monoclonal antibody therefore, and method for the
identification of haemophilus influenzae
Patent: EP 0281673-A1 1,14-SEP-1988;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 1 from Patent EP 0281673. The H. influenzae sequence has been updated by R. Pleischmann. New
database matches have been assigned, product names have been
improved, and a number of frame shifts have been corrected. We
gratefully acknowledge the work of Tatusov et. al. We have
incorporated their annotation into the /notes fields of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Tatusov,R.L., Mushegian,A.R., Bork,P., Brown,N.P., Borodovsky,M., Rudd,K.E. and Koonin,E.V.
